

HYBRID ZAMBRO

A dual-purpose bird for both meat and eggs, robust, friendly, feeds continuously and is a good forager. Hybrid Zambro lays more eggs than other indigenous chickens and can be kept in an enclosure or free range.

HYBRID ZAMBRO

BENEFITS OF REARING HYBRID ZAMBRO

| Hybrid Zambro Meat | Hybrid Zambro Layer |
|---|---|
| Reach 2.2-2.5kg between 56 days or 8 weeks. | Multi-colored in appearance and highly preferred by small producers |
| Good feed conversion. | Lays more eggs than the ordinary village chicken. |
| Easy to manage. | Produce between 200-240 eggs per year (brown shell eggs). |
| Low cost. | |
